

## At the Top of Our Game

### Protection From the Elements

DryGuard<sup>®</sup> enhanced roof sheathing is a Structural 1 Rated sheathing that has improved moisture resistance throughout the panel, as well as enhanced nail holding ability, stiffness and strength. All of these features combined help protect your roofs from the elements, and help avoid costly and time consuming call backs and repairs.

### High Performance and Easy Installation

Along with improved moisture resistance properties, DryGuard<sup>®</sup> panels have no core voids, knots or splits for a roof panel you can trust. For ease of installation, DryGuard panels come with nail lines, helping guide you when fastening to rafters. DryGuard is also backed by a lifetime limited warranty\* against delamination, giving peace of mind to you and your homeowner.

DryGuard enhanced roof sheathing is available in 1/2 CAT square edge and 19/32 CAT tongue and groove or square edge panels.
